EX-PARTE QUAYLE ACTION

1. This application is in condition for allowance except for the following formal matters:

Election/Restrictions

2. Claim 1 is allowable. The restriction requirement between inventions, as set forth in the Office action mailed on June 27, 2008, has been reconsidered in view of the allowability of claims to the elected invention pursuant to MPEP § 821.04(a). **The restriction requirement is hereby withdrawn as to any claim that requires all the limitations of an allowable claim.** Claims 3-9 and 12-22 are no longer withdrawn from consideration because the claim(s) requires all the limitations of an allowable claim.

In view of the above noted withdrawal of the restriction requirement, applicant is advised that if any claim presented in a continuation or divisional application is anticipated by, or includes all the limitations of, a claim that is allowable in the present application, such claim may be subject to provisional statutory and/or nonstatutory double patenting rejections over the claims of the instant application.

Once a restriction requirement is withdrawn, the provisions of 35 U.S.C. 121 are no longer applicable. See *In re Ziegler*, 443 F.2d 1211, 1215, 170 USPQ 129, 131-32 (CCPA 1971). See also MPEP § 804.01.

Drawings

3. The drawings are objected to under 37 CFR 1.83(a). The drawings must show every feature of the invention specified in the claims. Therefore, the housing recited in claim 1 and the sensor recited in claim 20 must be shown or the feature(s) canceled from the claim(s). No new matter should be entered.

Corrected drawing sheets in compliance with 37 CFR 1.121(d) are required in reply to the Office action to avoid abandonment of the application. Any amended replacement drawing sheet should include all of the figures appearing on the immediate prior version of the sheet, even if only one figure is being amended. The figure or figure number of an amended drawing should not be labeled as “amended.” If a drawing figure is to be canceled, the appropriate figure must be removed from the replacement sheet, and where necessary, the remaining figures must be renumbered and appropriate changes made to the brief description of the several views of the drawings for consistency. Additional replacement sheets may be necessary to show the renumbering of the remaining figures. Each drawing sheet submitted after the filing date of an application must be labeled in the top margin as either “Replacement Sheet” or “New Sheet” pursuant to 37 CFR 1.121(d). If the changes are not accepted by the examiner, the applicant will be notified and informed of any required corrective action in the next Office action. The objection to the drawings will not be held in abeyance.

Specification

4. The specification is objected to as failing to provide proper antecedent basis for the claimed subject matter. See 37 CFR 1.75(d)(1) and MPEP § 608.01(o). Correction of the following is required: The particular values for the horizontal and vertical movement play are recited in claims 6-8 and the sensor described in claim 20 have not been clearly disclosed in the specification.

Claim Objections

5. Claims 1 and 3-22 are objected to because of the following informalities:

With respect to claim 1, it is suggested that the term --a-- be inserted before "tachograph" in line 1 to use less awkward language.

With respect to claim 14, the term "the spacing direction" in lines 6 and 7 has no proper antecedent basis.

With respect to claim 18, the term "the movable parts" in line 3 has no proper antecedent basis.

With respect to claim 20, the term "the movable parts" in line 1 and the term "the spacing direction" in lines 3 and 5 have no proper antecedent basis.

With respect to claim 21, the term "the surroundings" in line 2 has no proper antecedent basis.

Appropriate correction and/or clarification is required.

Allowable Subject Matter

6. Claims 1 and 3-22 are objected for the reasons set forth above, but would be allowable if rewritten to overcome those objections to the satisfaction of the Examiner.
7. The following is a statement of reasons for the indication of allowable subject matter:
8. Applicant's arguments, see the response, filed August 9, 2010, with respect to the prior art rejection of claim 1 have been fully considered and are persuasive. Therefore, the prior art rejection of claim 1 has been withdrawn and claims 1 and 3-22 are hereby indicated as being allowable.

Conclusion

9. Prosecution on the merits is closed in accordance with the practice under *Ex parte Quayle*, 25 USPQ 74, 453 O.G. 213, (Comm'r Pat. 1935).

A shortened statutory period for reply to this action is set to expire **TWO MONTHS** from the mailing date of this letter.
